You are deploying a Static Site

Source Code

○ hameed008 / swiggy-clone-project · 1m ago   Edit

Name
A unique name for your static site.

swiggy-clone-project

Project Optional
Add this static site to a project once it's created.

⊹ Select a project...   ▾   /   ◇ Select an environment...   ▾

Branch
The Git branch to build and deploy.

main   ▾

Root Directory Optional
If set, Render runs commands from this directory instead of the repository root. Additionally, code changes outside of this directory do not trigger an auto-deploy. Most commonly used with a monorepo.

e.g. src

Build Command
Render runs this command to build your app before each deploy.

$ npm install; npm run build

Publish Directory
The `relative` path of the directory containing built assets to publish. Examples: `./`,`./build`,`dist` and `frontend/build`.

./dist

Environment Variables

Set environment-specific config and secrets (such as API keys), then read those values from your code. Learn more.
